

WINTER COVER CROPPING

AN EASY WAY TO REGENERATE YOUR SOIL

Want healthier soil, fewer weeds, and stronger plants without relying on more fertilizer?

Join us for an engaging look at cover crops and how they can work in Douglas County's unique climate and soils.

We'll explore which cover crops thrive in our region, when to plant them, and how they improve soil structure, reduce erosion, suppress weeds, support pollinators, and build long-term soil fertility.

Whether you manage a backyard garden, small farm, or anything in between, you'll leave with practical, local recommendations and a seasonal plan you can put to work right away.

Discover how a simple cover crop can turn the quiet season into one of the most productive tools in your toolbox.

Free

to attend

WHEN

Thursday,
October 1, 2026
4pm - 5pm

CLASS LOCATION

DC Farmers Co-op
3171 NE Stephens St,
Roseburg, OR 97470
